

# BUCKY

Bucky is an ex Royal Navy diving Gemini often seen carried on the deck of the Royal Navy's Hunt Class and Sandown mine countermeasure vessels in a support role. Constructed out of Hypalon material, Bucky's versatility and durability is down to her design and manufacture. The vessel is easily launched and is often used as the go to vessel for hard to access areas where no slipway is available. With 2 x operators she still offers enough deck space for emergency situations. Owing to her small size she is often used for those hard to reach projects which could mean under a jetty or a shallow river.

We currently have two of these vessels available for hire.

General Characteristics	
Vessel Name	Bucky
Manufacturer	Avon W400
LOA	5.20 Metres
Beam	1.90 Metres
Draught	0.20 Metres
Displacement	500 KG
Fuel Type	Petrol
Fuel Capacity	22+ litres
Propulsion	Honda 10hp

Technical Specification	
Navigation & Communications	Deeper Pro
	ICOM Handheld VHF
Systems & Welfare	Navigation Lights
	4 – Point Lifting
	Flare Pack
	1 <sup>st</sup> Aid Kit
	Manual Bilge Pump
	Dry Powder Fire Extinguisher
