

MODULAR PONTOON CUBES

High-Density Polyethylene (HDPE) cubes that measure 500mm x 500mm x 400mm with a connection lug on each corner. The cubes are then connected using a locking HDPE connecting pin. The pontoons can be virtually any shape and size with cubes quickly added or removed as required. Manufactured from HDPE the system is maintenance free and impervious to any corrosion issues. The cubes have a non-slip surface for added safety and ease of use. These pontoons are a safe and stable working platform which can be used in a variety of marine environments whilst being able to accommodate a substantial amount of equipment and personnel adding to their versatility.

General Characteristics

General Characteristics	
Size	500mm x 500mm x 400mm
Weight	7kg
Compression Load	Over 3500kg/sqm
Load Capacity	350kg/sqm
Material	High Density Polyethylene
Manufacture	Blow Moulding
Diagonal Lugs Tensile Strength	Over 1950kg

Optional Extras

Optional Extras
Handrails
Cleats
Fenders
Access Ladders
Winches
Mooring Eyes
Pile Guides
